expanding on the editors award winning article evolving to a new dominant logic for
 marketing this book presents a challenging new paradigm for the marketing discipline this
 new paradigm is service oriented customer oriented relationship focused and knowledge
 based and places marketing once viewed as a support function central to overall business
 strategy service dominant logic defines service as the application of competencies for the
 benefit of another entity and sees mutual service provision rather than the exchange of
 goods as the proper subject of marketing it moves the orientation of marketing from a
 market to philosophy where customers are promoted to targeted and captured to a market
 with philosophy where the customer and supply chain partners are collaborators in the
